

Compact InsurIntel™ services

Rapid Data Warehouse Implementation Services for Insurers

It's time to deliver on-demand, pervasive BI to your business units. Compacts' specially designed package of services offer the fastest, most effective way to integrate legacy and operational data and put "one version of the truth" in the hands of pricing analysts, underwriters, product operations, and marketing decision makers. Accelerate time to information and time to market.

We've saved clients millions in development costs with this unique service offering. Modularized for fast, flexible implementation, InsurIntel services save your organization time and money and lower the total cost of ownership for BI solutions.

Why Compact Solutions?

- Focused exclusively on high-performance enterprise information integration solutions
- "Right-shore" development options based on your requirements and budget
- Trusted partner-specialist with skillsets and experience unmatched by other organizations
- Complete set of best practice tools, templates, and techniques based on Compact 6D™ Methodologies
- Accelerated speed to value so you realize a fast time to success
- Lowered total cost of ownership (TCO) for your BI and DW solution
- Strong established technology partnerships with top tier organizations

Compact InsurIntel Services

- Faster access to integrated data for quicker analysis and modeling—so fast time to market.
- Ability to include large swaths of historical data—delivers greater accuracy for risk assessment, earnings, loss, pricing, etc.
- Ensures "one version of truth" to improve regulatory compliance, quality initiatives, etc.
- Faster time to market—analysis can be completed in minutes instead of days/ weeks.
- Reduced system maintenance and software licence costs—save potentially millions per year in software license savings alone.
- Empower users to self-serve their information—they are closer to the data they need.
- Enable IT governance strategies—more easily standardize BI tool sets for all functional groups to access the same information.
- Enable SOA (information as a service) initiatives by making fundamental policy and claims data readily available to applications.
- Project and Staff Mentoring

Achieve On-Demand BI Faster than You Think

Compact Solutions InsurIntel offering delivers a quick-to-implement, streamlined bundle of data integration and data warehouse services that quickly and efficiently combine rich stores of legacy data, previously difficult to access, with operational data and even third-party real-time data. Compact ensures that decision-makers get the intelligence they need when they want it.

Our solution provides key users, Pricing Analysts, Product Operations, Marketing, and others with fast, easy and efficient access to that valuable historic information—and in a format that can be easily and quickly accessed. Based on best practices achieved with top insurance organizations, Compact InsurIntel Services help you:

- Quickly re-platform those legacy systems onto less expensive distributed environments, like UNIX and Microsoft, so you can leverage existing reporting and analytic tools.
- Integrate legacy data sources with standard query reporting and analytical tools that are firmly in the hands of your users and analysts.
- Deliver a completely self-service data environment for real time access to data—when analysts need the intelligence—no waiting.

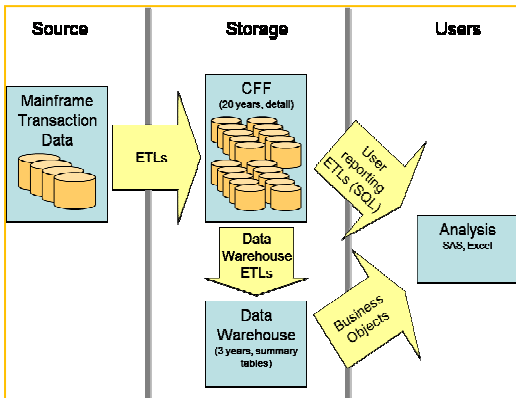

Realize Faster Time to Value with Compact InsurIntel

Compact's ready-to-go solution gives you the ability to deliver self-service business intelligence across the business—from claims management and policy administration, from underwriters to actuaries, and from marketing to risk analysts. They can all leverage the same historical data—one version of the truth—for better more accurate pricing and decision making.

Compact InsurIntel creates a rich, centralized data repository that integrates core claims and policy and premium transaction data for on-demand high performance analysis. That means users can now access tens of terabytes of legacy data in real-time using standard BI tools. Expect decision making to accelerate and the quality of those decisions to improve dramatically.

With InsurIntel's pre-built models, you can quickly set up rules for loss ratio, earned premium, earned loss, and other situations. That means you save time and budget in creating these highly complex elements.

Query response time is accelerated by positioning pre-calculated complex measures within the data repository at frequently used aggregation levels. The most frequent

Compact Services

Complete Enterprise Information Integration (EII)

- Diagnostics
- Solution Development (off-shore or on-shore)
- Data Architecture
- Master Data Management
- Data Quality
- Real Time EII
- Systems Architecture
- Data Warehouse Assessment
- Data Warehouse Design
- ETL Design & Development
- Metadata Management & Repositories
- Data Warehouse Performance Optimization
- Platform Migration

Unique EII Expertise

- Design & Development
- Metadata Systems
- Application Migration from between ETL Platforms
- Continuous Flow Processing
- Metadata Driven ETL
- Performance Optimization
- Data Profiling and Data Quality
- Center of Excellence (COE) Development
- Project and Staff Mentoring

calculations (such as loss, exposure, earnings, etc.) are performed within the repository after policy and claims transactions have been merged.

- Integrates data from silo'd operations and applications, mainframe legacy databases, third-party sources, etc., to enable a comprehensive picture of the market or customer landscape.
- Re-platforms expensive legacy data residing on mainframes to less expensive distributed, open systems.
- Dynamically integrates disparate data sources into one repository to deliver one version of the truth.
- Optimizes the solution for multi-dimensional analysis and modeling tools so analysts can easily drill down and go deeper.
- Scales easily to handle data volume growth.
- Uses the best of breed technologies—open systems platform bringing the data closer to users, no more waiting, no more expensive database storage costs.

Complete Toolkit of Pre-Built Elements

Compact InsurIntel data warehouse lowers your total cost of ownership and speeds implementation. Compact brings a complete tool kit of pre-built elements, all of which can be quickly customized to your data environment. These include data models, data extraction and transformation routines, business rules, and code templates to handle complex queries to:

- Process historical premium and claim transactions
- Convert highly denormalized transactional records to new data structures more appropriate for reporting/analysis
- Dynamically query the new data structures.

Compact InsurIntel delivers a cost-effective information architecture that dramatically improves the overall business value of your information.

About Compact Solutions

Compact Solutions is a premier provider of high-performance Enterprise Information Integration (EII) solutions that solve the toughest data challenges for information intensive Global 1000 businesses. A trusted advisor, Compact experts offer highly-sought, deep technical skills and proven experience to accelerate speed to value for data warehousing, enterprise data integration, data management, and business intelligence. Compact's unique delivery model blends onsite, offsite, and offshore development options for maximum flexibility and responsiveness to client needs. www.compactsolutionsllc.com.
